

PLACEMENT OF RUN OUT INDICATOR LABEL

TASK

Place a label onto an automotive wheel.

CHALLENGES

- The assembly of the label is part of an automation assembly cell that determines the placement position of the label.
- The placement of the label must be accurate and repeatable for extended production runs.

SOLUTION

- Model 1515
- Customized chuck
- Rewind reel

FEATURES & BENEFITS

- The Model 1515 is a compact, cost-effective solution within a small footprint. Thus, it takes up minimal space in the assembly cell.
- AccuPlace's patented technology ensures a repeatable and accurate placement.
