

LABELING A RAPID TEST DEVICE

TASK

Apply a label onto a rapid blood test device.

CHALLENGES

- Because of the risk of contamination of chemical agents, the label application must take place in a clean room.
- The label has to be placed very accurately as recess areas in the molded part correspond with the label design.

SOLUTION

- Model 4065
- Clean room version
- Customized chuck
- Customized nest
- Benchtop configuration for semi-automatic operation
- Rewind reel

FEATURES & BENEFITS

- Given the size of all label the customer is using, the 4065 is the most appropriate choice and allows a later addition of other products.
- AccuPlace's peeling technology allows for consistent peeling and repeatedly accurate placing of the label.
- The "clean room" version of the 4065 reduces the risk of particulates introduced by the machine, meeting a key requirement of the customer.
- The bench top platform consisting of a base with feet, built-in power supply, and 2-hand control provides a simple cost-effective solution that captures the quality benefits of automation.
