

PLACEMENT OF DOUBLE SIDED ADHESIVE ONTO SUBSTRATE

TASK

Present and peel double-sided adhesive tape for placement onto a substrate.

CHALLENGES

- The adhesive tape has both top and bottom liners.
- The adhesive is very thin and fragile, thus difficult to peel.
- The adhesive assembly is part of a multi-step automated process.

SOLUTION

- RM3065
- 2 Rewind reels

FEATURES & BENEFITS

- AccuPlace's peeling technology allows for consistent peeling of the label, enabling the integrator to concentrate on the customized phases of the substrate assembly and ensuring high overall quality in the finished product.
- The RM3065's foot print and easy interface make it ideal for integration into an automated assembly line. A standard interface ensures fast and easy integration and communication with the assembly station.
